The All New

TRIDENT®

**The World's FIRST
ETL VERIFIED
Fire File for
WATER PROTECTION™**

TRIDENT® - UL Rated, Insulated Files

Did you know that 95% of all fires have water present? With water comes water damage, which can be a more common and more serious threat to your valuable records than the actual fire itself. In the event your files are in a different location than where fire is present, your files may still be subject to devastating water damage as a result of sprinkler and/or extinguisher spray. To address this ever-important need, Schwab brings you the all new TRIDENT, the world's first ETL verified fire file for water protection.

TRIDENT® Series fire files offer protection from:

fire

impact

explosion

water

theft

Look for the UL Mark of Safety on our products.
