

# **Your Future Could Go Up In Smoke!**

**Protect the future  
of your business  
with quality  
insulated files.**

 **SCHWAB CORP.**  
A wholly owned subsidiary of *SentrySafe*

SCHWAB 5000

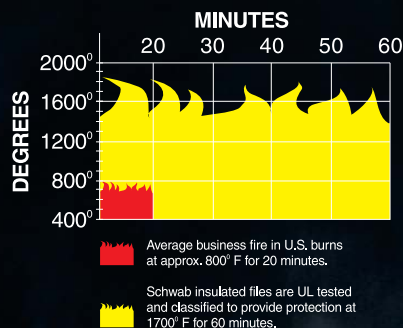

**F**ire could destroy your business! In fact, eight businesses burn almost every hour in the United States resulting in over \$2.3 billion in annual losses\*. Unfortunately, seven out of ten have not adequately protected their vital records.

Don't be one of those businesses that gets hit by fire and loses customer, personnel and tax files, accounts receivable and records of compliance. When that information is destroyed, a business often fails. Survival is possible, but preparation is necessary.

How long do you think paper records will last in a standard metal file cabinet at 800° F? Or how much information will you be able to retrieve when a disk has been soaked in water? It's not just fire, but the resulting heat, smoke and water that must be guarded against, too. Schwab has developed quality insulated files that provide guaranteed

protection against these elements for paper, diskettes, tape cartridges, CDs and all other forms of media in today's workplace.

The average business fire burns at approximately 800° F, and peaks within 10-15 minutes\*\*.

Schwab's insulated files are Underwriters Laboratory (UL) classified to provide protection at temperatures reaching 1700° F

during a one-hour test. The UL label carries the assurance that Schwab files have passed the test. Schwab's label guarantees that the contents are safe.

### Superior Quality

Schwab uses Insulite™ insulation in every fire file. Insulite is the most efficient insulation on the market today and provides

## You Get the Best!

- 1 The seamless construction is more contemporary and stylish than the old cap and sleeve technique.
- 2 Insulite, the most efficient insulation in the industry, provides maximum protection with thinner walls and less weight than competitors' insulation.
- 3 Painted in a dust-free environment, the durable finish is available in a variety of attractive colors.
- 4 Recessed handles have label holders that can be easily seen without kneeling, even on lower drawers.
- 5 Standard plunger key lock secures all drawers. Other locking options, including a Medeco security key lock, are available. See page 7 for details.
- 6 Schwab's drawers roll smoothly and freely on a rugged suspension system even when fully loaded.
- 7 Every file drawer is completely insulated making each one independently fire resistant. If a drawer is accidentally left open and fire strikes, this feature will halt the spread of fire throughout the entire file.
- 8 An inner steel jacket prevents entry into a locked drawer from an unlocked compartment. It also keeps all insulation out of your files.

UL classified protection. Remember that thicker insulation does not mean better insulation. Insulite allows Schwab files to offer features like thinner walls, lighter weight and recessed handles without compromising fire protection.

Schwab files look great, too. The seamless construction of Schwab files has a

much more attractive appearance than competitor's old cap and sleeve design.

Each beautiful exterior comes in a variety of pleasing colors which make them an attractive addition to any office. Many interior options are also available to accommodate specific filing needs.

9

All Class 350 legal-size drawers are slotted for movable hanging frames to provide the convenient flexibility of using either legal-, A-4-, folio- or letter-size hanging file folders.

10

Insulated interlocking drawer joints provide a tight seal for the drawers in the event of a fire.

11

Every Schwab file is UL Classified as either Fire Resistant or Fire and Impact Resistant. All files also carry an additional 1½ hour manufacturer's certification.

## Series 5000 Vertical Files

Optional interior drawer-in-a-drawer with insert for 3" x 5" card filing.

### For paper document protection

No other form of vital paper record protection is as fail-safe, dependable or convenient as that provided by Schwab's Series 5000 line of fire files. Available in two-, three- and four-drawer models in both letter and legal sizes, the Series 5000 comes with follower blocks and frames for hanging folders. File interiors can be customized to fit any number of special filing

applications and have flexible options such as the drawer-in-a-drawer for check filing or index cards.

Each Schwab Series 5000 vertical file is 31" deep with 26" of front-to-back filing space and comes with a UL Class 350 - 1 Hr. classification. Those rated as Fire Resistant assure protection from temperatures reaching 1700° F for one hour – far greater than the normal business fire. (See chart pg. 2) Those rated as Fire and Impact Resistant add the extra assurance that if the file falls through a floor, up to 30 feet, or is hit by falling beams or debris, the drawers will not jar open.

Series 5000 vertical files include frames for hanging folders as a standard accessory.

## Series 5000 Lateral Files

### For paper document protection

Series 5000 Lateral Files offer choices of two-, three- and four-drawer models in 30", 36" and 43" widths, and carry the UL 350 - 1 Hr. classification for either Fire Resistance or Fire and Impact Resistance. With so many options, Series 5000 Lateral Files will accommodate almost any paper document filing need.

Standard accessories allow front to back filing of legal- or letter-size hanging folders or side-to-side filing of legal-size hanging folders. Other accessories are available to meet alternative storage needs.

Optional movable dividers provide support for manila folders, catalogs or binders.

Lateral files with front-to-back letter-size hanging files and side-to-side legal-size hanging files.

## Series 2500 Vertical Files

### For paper document protection

This attractive series of vertical files is perfect for protecting paper documents in a compact area such as an office workstation or home office. Although smaller - only 25" deep - they are again available with both the UL Class 350 - 1 Hr. Fire Resistant and Fire and Impact Resistant labels, so you may choose based on the intended location of the file.

Available in legal- or letter-size, and in two- or four-drawer models, each drawer includes a movable divider and frames for hanging folders.

Movable dividers keep manila folders upright in the Series 2500 files.

**In addition to standard key locks, all the files on these pages offer five other locking options. See page 7 for more information.**

## Mixed Media Files

### For paper and computer media protection

Schwab's mixed media files are one of the few fire files offering UL classified protection for all types of media.

The paper record storage drawers are tested and rated by UL to be Class 350 - 1 Hr., indicating internal temperatures stay below 350° F when exterior temperatures reach 1700° F. During the same 1700° F test, media drawers were UL Classified to maintain an internal temperature of 125° F without exceeding the 80 percent humidity level. This stringent standard is required to protect computer media. The construction of each file protects against magnetic interference as well.

Schwab mixed media files are legal-size, 31" deep and available in either two-, three- or four-drawer versions with the top drawer always for paper storage. The Media Manager, a compact 25" deep, two-drawer file, with one paper drawer and one media drawer, is also available. This model is the perfect solution for office work-stations.

These files may be either right- or left-hinged to allow placement anywhere at home or in the office. They come standard with inserts for either CDs or cartridges.

Flexible storage insert is included to provide convenient access for most types of media.

# Options and Accessories

## Locking Options

**UL Rated Medeco Security Lock**  
For those consumers who desire the extra protection that a security classified lock affords, the Medeco key lock design safeguards against lock picking, manipulation, drilling, pulling, and other forms of attack. Restricted key duplication protects against unauthorized key access. These features, combined with Schwab's unique file construction, yield the only fire file that is virtually impossible to break into without leaving distinct visible evidence.

**Electronic Digital Lock**  
The electronic digital lock gives the benefits of multiple combinations and ease of combination change. An easy to see digit pad allows the user to open the lock in about seven seconds, or change the combination within a few minutes.

**Group 2 Combination Lock**  
The three-digit combination lock offers extra security and convenience to users.

**Key Locking Group 2 Combination Lock**  
This lock serves as dual security whereby a three-digit combination lock won't operate until the key lock is opened. Additional customized locking options are also available.

**Group 1R Combination Lock**  
The special design of this lock makes it difficult to manipulate open, or use x-ray technology to open, yet gives the user the extra security and convenience of a combination lock.

**Document Storage Inserts – 31" Deep Vertical and Lateral Files**  
These storage inserts rest inside the file drawer to provide convenient access to documents. Available to store 4x6", 4x9", 4.5x9.5" and 7x9.5" documents for legal files, 3x5", 4x9", or 4x5.75" documents for letter files, and 3x5", 4x6" and 4x9" documents for lateral files.

**Movable Dividers – Lateral Files**  
These dividers provide support for manila folders, catalogs, or binders in the lateral file. Dividers are sold individually, and snap easily into the back and bottom of the drawer.

**Card and Check Trays – Vertical and Lateral Files**  
These trays fit sideways into vertical file drawers and front-to-back in lateral file drawers. They are available in sizes to store 3"x5", 5"x8", 6"x9", 4"x9" and 9"x6" documents. Lower level trays rest on the bottom of the file drawer, while upper level trays ride on the rails for hanging folders.

**Drawer Back Inserts – Lateral Files**  
The drawer back insert shortens the drawer depth from legal-size to letter-size to allow side-to-side filing of letter-size hanging folders. It should also be used to shorten the drawer depth when filing letter-size documents using movable dividers.

**Drawer-in-a-Drawer Interiors – 31" Deep Vertical and Lateral Files**  
The drawer-in-a-drawer interiors provide the most efficient way to store index cards and checks. Inserts for 3"x5", 4"x6", and 4"x9" documents provide excellent capacity with easy accessibility.

## Media COOLER® gives you special protection.

The Schwab Media COOLER can turn your fire file into one which protects computer media too! Cassettes, cartridges, compact discs and diskettes fit easily into this compact and economical case. When the COOLER is placed inside any U.L. Class 350 rated product, your computer media is protected from the heat and moisture of a fire.

Schwab's Media COOLER has a spring loaded latch that automatically seals when the lid is closed.
